maximum matching on bipartite graphs
reduced bandwidth
distance to disconnected
vertex connectivity
distance to complete
vertex cover
maximum leaf number
bounded components
clique cover number
maximum matching
edge clique cover number
distance to co-cluster
twin-cover number
distance to stars
distance to linear forest
vertex integrity
feedback edge set
bandwidth
maximum independent set
reduced edgeless
neighborhood diversity
distance to cluster
treedepth
feedback vertex set
b-index
distance to bounded components
topological bandwidth
cutwidth
domination number
maximum induced matching
distance to cograph
modular-width
shrub-depth
distance to interval
distance to block
NLCT-width
d-path-free
pathwidth
distance to outerplanar
distance to maximum degree
degree treewidth
carving-width
pathwidth+maxdegree
diameter
distance to chordal
clique-width
clique-tree-width
odd cycle transversal
linear clique-width
distance to planar
treewidth
genus
maximum degree
average distance
distance to perfect
NLC-width
rank-width
linear rank-width
linear NLC-width
outerthickness
star-arboricity
branch width
thickness
book thickness
c-closure
girth
boolean width
odd-flip-width
acyclic chromatic number
boxicity
asim-width
twin-width
degeneracy
radius-r flip-width
chromatic number
arboricity
average degree
chordality
maximum clique
minimum degree
bisection bandwidth
domatic number
edge connectivity
